

## Single seat seesaw on spring VH101D

Product type VH-101D-10

### Basic information

|                              |                          |
|------------------------------|--------------------------|
| Age category                 | 2 - 10 years             |
| Minimum area                 | 3,5 m x 2,3 m            |
| Equipment measurements       | 0,49 m x 0,29 m x 0,83 m |
| Free fall height:            | 1 m                      |
| Load capacity:               | 54 kg                    |
| Max. number of users:        | 1                        |
| Fall zone: EN 1177           | null                     |
| Designation:                 | exterior                 |
| Availability of spare parts: | supplied by the          |
| Certificate of Compliance:   | ČSN EN 1176 - 1, 6       |

### Material

Wooden units - thick glued wooden supports  
 Metal units - structural steel  
 Seats - HPL  
 Spring - special spring steel

### Finish

null  
 Duplex powder coated with coat curing  
 Hot-dip galvanizing

### Description

The seesaw beam is made from a glued wooden support and is secured to the support springs. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The springs are made from special spring steel and are duplex powder coated with coat curing according to RAL to prevent corrosion. The seats are made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). The handles are zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. The swing is constructed with durability and long life in mind. Impacts are dampened by rubber bumpers. All fastening material is galvanized or stainless steel.
