Train engine MA200D

Product type MA-200D-10

Basic information

Age category 0 - 10 years Minimum area 5,5 m x 4,1 m

Equipment measurements 2,52 m x 1,17 m x 1,58 m

Free fall height:

Load capacity:

Max. number of users:

Fall zone: EN 1177

Designation:

Availability of spare parts:

Certificate of Compliance:

0,2 m

216 kg

4

null

exterior

supplied by the

ČSN EN 1176 - 1

Material

Metal units - structural steel Wooden units - thick glued wooden support Platform - HPL

Plastic units - HDPE

Finish

null

Duplex powder coated with coat curing Hot-dip galvanizing

Description

5.5m 5.5m

The support structure of the train engine is made of thick glued wooden supports. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. All other parts of the play unit are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). Platform is made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). All fastening material is galvanized or stainless steel.
