Train VL200KW - brown

Product type VL-200KW-10

Basic information

Age category 0 - 10 years 8,6 m x 4,1 m Minimum area

Equipment measurements 5,62 m x 1,17 m x 1,59 m

1 m Free fall height: 540 kg Load capacity: Max. number of users: 10 Fall zone: EN 1177 null Designation: exterior Availability of spare parts: supplied by the Certificate of Compliance: ČSN EN 1176 - 1

Material

Metal units - structural steel Wooden units - water-proof plywood Plastic units - HDPE

Tunnels - fibreglass

9m 6.03m

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the train is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are anchored to concrete footings. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

All other parts of the play unit are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments) or from water-proof plywood which is designed for external use. Crawl tunnels are made from fibreglass which is UV stable and it is characterised by high colour stability. All fastening material is galvanized or stainless steel.
