Metal units - structural steel Ropes and nets - polypropylene with a steel internal core Plastic units - polyamide

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structures of the rope unit are made from structural steel, they are zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion and fixed in a concrete bed. The ropes are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and are connected with plastic joints. All fastening material is galvanized or stainless steel.

Equipment

We offer three color variants of the support structure - red, blue and brown.
