null

Description

The support structures of the rope unit are made from structural steel with a diameter of 89 mm, they are zinc coated and KOMAXIT powder coated according to the RAL colour chart and fixed in a concrete bed. The ropes are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and are connected with plastic joints. All fastening material is galvanized or stainless steel.

Equipment

We offer three color variants of the support structure - red, blue and brown.
