null
exterior
supplied by the

Material

Metal units - structural steel

Plastic units - HDPE

Finish

null null

1.3m

Description

The support structure of the workout element is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements, and coating with baked paint KOMAXIT according to the RAL colour system. These structures are anchored to concrete footings with zinc anchors. All other metallic elements, such as handles, parallel bars etc., are also zinc coated and treated with baked paint KOMAXIT according to the RAL colour system or, if required by the customer, the elements can be made in stainless steel.

All bench boards and steps are made of high quality HDPE (high-pressure, full-coloured polyethylene, which is characterised by high colour stability, UV resistance and mainly safety because it is rigid and there is no risk of injury caused by sharp broken fragments). All connecting material is zinc or stainless steel coated.

Equipment

Color variants: blue-black, red-black, yellow-black, green-black, grey-black, orange-black.
