Skill path SD104KS - silver

Product type

SD-104KS-10

Basic information

2 - 10 years
6,8 m x 6,7 m
3,8 m x 3,7 m x 2,26 m
1 m
432 kg
8
null
exterior
supplied by the
ČSN EN 1176 - 1, 11

Material

Platform - HPL Metal units - structural steel Plastic units - polyamide Ropes and nets - polypropylene with a steel internal core

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the skill path is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are embedded in a concrete base. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

Ropes and nets are made of HERKULES (16 mm polypropylene ropes with inner steel core) and are connected by plastic connectors. The platforms are made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). All connecting material is zinc or stainless steel coated.

Equipment

We offer three color variants of the support structure - silver, blue and brown.
