Slide with a ladder KZ6101KW (f.h. 1 m) - brown

Product type KZ-6101KW-10

Basic information

Age category 2 - 15 years Minimum area 4 m x 6,5 m

Equipment measurements 0,97 m x 2,96 m x 1,81 m

Free fall height:

Load capacity:

Max. number of users:

Fall zone: EN 1177

Designation:

Availability of spare parts:

Certificate of Compliance:

1 m
270 kg
5 null
exterior
supplied by the
ČSN EN 1176 - 1, 3

Material

Platform - HPL

Metall parts - stainless steel

Plastic parts - HDPE Slide - fibreglass

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the slide is made from structural steel, which is zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion and is fixed in a concrete bed. All metal units are zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

The slide is made from fibreglass. The surface of the slide and side walls are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The platform is made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). All fastening material is galvanized or stainless steel.
