Slide with a ladder KZ100KW (f.h. 1 m) - brown

Product type KZ-100KW-10

Basic information

Age category 2 - 15 years Minimum area 4 m x 6,5 m

Equipment measurements 1 m x 2,94 m x 1,79 m

Free fall height:

Load capacity:

Max. number of users:

Fall zone: EN 1177

Designation:

Availability of spare parts:

Certificate of Compliance:

1 m

270 kg

5 null

exterior

supplied by the

ČSN EN 1176 - 1, 3

Material

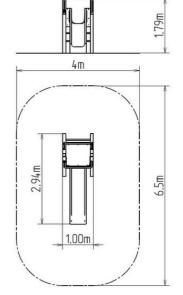

Wooden units - water-proof plywood Metall parts - stainless steel

Plastic parts - HDPE Slide - fibreglass

Finish

null

Description

The support structure of the slide is made from structural steel, which is zinc coated and KOMAXIT powder coated according to the RAL colour chart and is fixed in a concrete bed. All metal units are zinc coated and KOMAXIT powder coated according to the RAL colour chart.

The slide is made from fibreglass. The surface of the slide and side walls are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The platform is made from water-proof plywood or from HDPE should the client require. All fastening material is galvanized or stainless steel.
