exterior

supplied by the

ČSN EN 16630

#### Material

Metal units - structural steel

Plastic parts - HDPE

## Finish

null

## **Description**

The support structure of the workout set is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements, and coating with baked paint KOMAXIT according to the RAL colour system. These structures are anchored to concrete footings with zinc anchors. All other metallic elements, such as handles, parallel bars etc., are also zinc coated and treated with baked paint KOMAXIT according to the RAL colour system or, if required by the customer, the elements can be made in stainless steel.

All bench boards and steps are made of high quality HDPE (high-pressure, full-coloured polyethylene, which is characterised by high colour stability, UV resistance and mainly safety because it is rigid and there is no risk of injury caused by sharp broken fragments). All connecting material is zinc or stainless steel coated.

## **Equipment**

Color variants: blue-black, red-black, yellow-black, green-black, grey-black, orange-black.
