Material

Supporting column, handles - made of steel tubes

1.15m 1.15m

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The handles are made of powder-coated steel tubes. The supporting column is made of a steel tube with a mounting flange at the bottom. The frame and tread are made of powder coated sheet metal. Rolling bearings are used for movable connections. Holes are sealed with steel elements at the ends. All fasteners are stainless.

Functions: It works out the calves, thighs and buttock and muscles of upper extremities. It improves the coordination of movements and the whole body stability.

Instructions: Position yourself on the small platforms and grasp the handles firmly. Start pressing on the small platforms on which you are standing as if you were walking on the spot, and swing in turns with your arms along the body.
