Skill path SD112KW - Brown

SD-112KW-10

Product type

Basic information

Material Metal unit

Metal units - structural steel Plastic units - HDPE

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the skill path is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are embedded in a concrete base. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

All step boards are made of high quality HDPE (high-pressure, full-coloured polyethylene, which is characterised by high colour stability, UV resistance and mainly safety because it is rigid and there is no risk of injury caused by sharp broken fragments). All connecting material is zinc or stainless steel coated.

Equipment

We offer three color variants of the support structure - red, blue and brown.
