

## Crawler with a crawling tube - Fire truck

Product type PP-100K-10

### Basic information

|                            |                             |
|----------------------------|-----------------------------|
| Age category               | 0 - 10 years                |
| Minimum area               | 5,3 m x 4,1 m               |
| Equipment measurements     | 2,29 m x 1,03 m x 1,19 m    |
| Free fall height:          | 1 m                         |
| Max. number of users:      | 5                           |
| Fall zone: EN 1177         | null                        |
| Certificate of Compliance: | ČSN EN 1176-1 ed.2 +A1:2024 |

### Material

Plastic units - HDPE  
Tunnel - (PE) Polyethylene  
Metal units - structural steel  
Platforms - Foamlite

### Finish

Duplex powder coated with coat curing  
Hot-dip galvanizing

### Description

The supporting structure of the fire truck is made of structural steel, which is protected against corrosion by the zinc coating, which provides a very significant prolongation of the life of the gaming elements or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are embedded in a concrete bed. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. All other parts are made of high quality plastic HDPE (full-coloured high-density polyethylene, which is characterized by high color fastness, UV resistance and mainly safety, because it is non-breakable and there is no risk of injury to children sharp fragments). Crawl tunnel is made from HDPE (full-coloured polyethylene, which is characterised by high colour stability and UV resistance). All fasteners are galvanized or stainless steel.

### Equipment

1x crawler tunnel, 1x steering wheel, 2x interactive sidewalls, 4x cushions
