Description

Duplex powder coated with coat curing Hot-dip galvanizing

The body of the rocker and the seat are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The swing spring is made from special spring steel and duplex powder coated with coat curing according to RAL to prevent corrosion. All fastening material is galvanized or stainless steel.
