Description

The support structure of the climbing set is made from structural steel, it is zinc coated which significantly prolongs the life of the play unit or duplex powder coated with coat curing according to RAL to prevent corrosion and it is fixed in a concrete bed. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.. The climbing nets, climbing rope, net and rope ladder are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and they are connected with plastic joints. The Ball toSS88 is made of high-quality HDPE (high-preSS88ure, full-color polyethylene, which is characterized by high color stability, resistance to scratching, UV resistance and especially safety because it is brittle and there is no risk of injury to children by sharp debris). All fasteners are galvanized or stainless steel.
