

## Rope weave LP090KB - blue

Product type LP-090KB-10

### Basic information

|                              |                        |
|------------------------------|------------------------|
| Age category                 | 2 - 10 years           |
| Minimum area                 | 6,3 m x 3,5 m          |
| Equipment measurements       | 3,3 m x 0,43 m x 1,3 m |
| Free fall height:            | 1 m                    |
| Load capacity:               | 162 kg                 |
| Max. number of users:        | 3                      |
| Fall zone: EN 1177           | null                   |
| Designation:                 | exterior               |
| Availability of spare parts: | supplied by the        |
| Certificate of Compliance:   | ČSN EN 1176 - 1, 11    |

### Material

Metal units - structural steel  
Ropes and nets - polypropylene with a steel internal core  
Plastic units - polyamide

### Finish

null  
null

### Description

The support structures of the rope unit are made from structural steel with a diameter of 89 mm, they are zinc coated and KOMAXIT powder coated according to the RAL colour chart and fixed in a concrete bed. The ropes are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and are connected with plastic joints. All fastening material is galvanized or stainless steel.

### Equipment

We offer three color variants of the support structure - red, blue and brown.
