

UNIVERSAL 4U156KW-B - brown

Product type 4U-156KW-10-B

Basic information

| | |
|------------------------------|--------------------------|
| Age category | 1 - 10 years |
| Minimum area | 6,81 m x 7 m |
| Equipment measurements | 3,81 m x 2,45 m x 2,41 m |
| Free fall height: | 1 m |
| Load capacity: | 432 kg |
| Max. number of users: | 8 |
| Fall zone: EN 1177 | null |
| Designation: | exterior |
| Availability of spare parts: | supplied by the |
| Certificate of Compliance: | ČSN EN 1176 - 1, 2, 3 |

Material

Metal parts - structural steel
 Plastic parts - HDPE, polyamide
 Slide - stainless steel
 Platforms - HPL
 Seat - rubber with an aluminum insert

Finish

null
 null

Description

The support structure of the tower unit is made of structural steel (metal profile 60 × 60 mm) which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements, and coating with baked paint KOMAXIT according to the RAL colour system. All other metallic elements are also zinc coated and treated with baked paint KOMAXIT according to the RAL colour system.

The slide is made from stainless steel. The surfaces of the slides, barriers, etc. are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The platform is made from HPL (High-pressure laminate, which is characterised by high colour stability, UV resistance and water resistance). The swing is hung on a metal girder using galvanized chains. The seat is made of rubber and is reinforced with an aluminum insert. The chains are stainless steel, resulting in a very prolonged service life of the product. All fastening material is stainless steel.

Equipment

Tower, slide, roof in the shape of a leaf, sloping ramp with steps and HDPE handles, 2x barrier, BABY seat.
