#### Material

Metal parts - structural steel

Normal seat - aluminum, covered with rubber Baby seat - rubber with aluminum insert

#### **Finish**

null

# 4.0m 4.0m 6.82m

#### **Description**

The support structure of the swing is made from structural steel, which is zinc coated and KOMAXIT powder coated according to the RAL colour chart. The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing a and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground.

The seat is made of rubber and is reinforced with an aluminum insert. The Normal seat is made of aluminum, covered with a soft and comfortable rubber. The chains are stainless steel, resulting in a very prolonged service life of the product. All fastening material is galvanized or stainless steel.

#### **Equipment**

6x metal beam (galvanized), 4x Normal seat, 2x Baby seat.We offer three color variants of the support structure - red, blue and brown.
