Description

The bench is made from spruce wood, or oak should the client require. The wood is impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The posts of the bench are made from structural steel, protected against corrosion by hot-dip galvanizing, which significantly prolongs the life of the play unit. The structures are fixed in a concrete bed. All fastening material is galvanized or stainless steel.
