Rope bridge with steps LL103KB - blue

Product type LL-103KB-10

Basic information

Age category 3 - 15 years
Minimum area 5 m x 4 m
Equipment measurements 2 m x 1 m x 1,07 m

Free fall height:

Load capacity:

Max. number of users:

Fall zone: EN 1177

Designation:

Availability of spare parts:

Certificate of Compliance:

1 m
162 kg
3
null

supplied by the

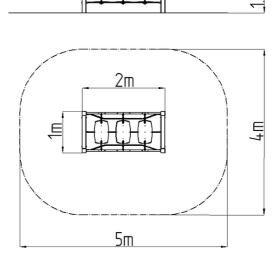

Material

Metal units - structural steel Plastic units - HDPE, polyamide

Ropes - polypropylene with a steel internal core

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the rope bridge is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements or duplex powder coated with coat curing according to RAL to prevent corrosion. The structure is fixed in a concrete bed. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

The ropes are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and are connected with plastic joints. Steps boards are made of high quality HDPE (high-pressure, full-coloured polyethylene, which is characterised by high colour stability, UV resistance and mainly safety because it is rigid and there is no risk of injury caused by sharp broken fragments). All fastening material is galvanized or stainless steel.

Equipment

We offer three color variants of the support structure - red, blue and brown.
