Material

Metal units - structural steel Plastic units - Foamlite

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are embedded in a concrete base. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

÷

22п

All step boards are made of high quality Foamlite (high-pressure, which is characterised by high colour stability, UV resistance and mainly safety because it is rigid and there is no risk of injury caused by sharp broken fragments). All connecting material is zinc or stainless steel coated.
