

## Shade cover for sandpit 3x1,5 m (adjustable) ZPI3015

Product type ZPI-3015-10

### Basic information

|                            |                             |
|----------------------------|-----------------------------|
| Age category               | from 0 years                |
| Minimum area               | 5,88 m x 4,49 m             |
| Equipment measurements     | 3,88 m x 2,5 m x 2,4 m      |
| Free fall height:          | m                           |
| Max. number of users:      | Not specified               |
| Fall zone: EN 1177         | null                        |
| Certificate of Compliance: | ČSN EN 1176-1 ed.2 +A1:2024 |

### Material

Metal parts - structural steel  
Tarpaulin - rubber coated polyester mesh

### Finish

Hot-dip galvanizing

### Description

The supporting structure of the sandbox shading is made of structural steel, which is protected against corrosion by hot-dip galvanizing, which results in a very significant extension of the life of the gaming element. This construction is embedded in a concrete bed. The sandbox shade is made from rubber coated polyester mesh, which is UV resistant. The sandbox shading is water permeable. All fasteners are galvanized or stainless steel.
