

## Skill path - metal

Product type SDO-8014KW-10

### Basic information

Age category	3 - 15 years
Minimum area	7,9 m x 6,72 m
Equipment measurements	4,9 m x 3,72 m x 1 m
Free fall height:	1 m
Max. number of users:	11
Fall zone: EN 1177	null
Certificate of Compliance:	ČSN EN 1176-1 ed.2 +A1:2024 ČSN EN 1176-11:2015

### Material

Metal units - structural steel  
 Plastic units - HDPE, polyamide  
 Ropes - polypropylene with a steel internal core  
 Platform - HPL  
 Steps boards - HPL

### Finish

Duplex powder coated with coat curing  
 Hot-dip galvanizing

### Description

The support structure of the skill path is made from structural steel, it is zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. The structure is fixed in a concrete bed. All other metal units are zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. The ropes and nets are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core). The platforms are made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). Steps boards are made of HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). All step boards are made of high quality HDPE (high-pressure, full-coloured polyethylene, which is characterised by high colour stability, UV resistance and mainly safety because it is rigid and there is no risk of injury caused by sharp broken fragments). All fastening material is galvanized or stainless steel.

### Equipment

We offer two color variants of the support structure - brown and silver.
