# Balance beam KL101D (f.h. 1 m)

KL-101D-10 Product type

### **Basic information**

Age category 3 - 15 years 6 m x 3,1 m Minimum area Equipment measurements 3 m x 0,1 m x 0,3 m

0,3 m Free fall height: 108 kg Load capacity: Max. number of users: 2 Fall zone: EN 1177 null Designation: exterior Availability of spare parts: supplied by the Certificate of Compliance: ČSN EN 1176 - 1

#### Material

Wooden units - glued wooden supports

Metal units - stainless steel

# 6т Ę 3.00m

## **Finish**

null

## **Description**

The balance beam is made from thick glued wooden support. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden support is impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground. All fastening material is galvanized or stainless steel.
