Train VL110D

Product type

VL-110D-10

Basic information			
Age category Minimum area Equipment measurements Free fall height: Load capacity: Max. number of users:	0 - 10 years 8,6 m x 4,1 m 5,62 m x 1,17 m x 1,59 m 0,5 m 540 kg 10		
Fall zone: EN 1177 Designation: Availability of spare parts: Certificate of Compliance:	null exterior supplied by the ČSN EN 1176 - 1	 8.6m	
Material			
Metal units - structural steel Wooden units - thick glued wooden supports Plastic units - HDPE Tunnels - fibreglass			

5.62m

Finish	\ <u>`</u>
null Duplex powder coated with coat curing	· · ·
Hot-dip galvanizing	

Description

The support structure of the train is made of thick glued wooden supports. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. All other parts of the play unit are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). Crawl tunnels are made from fibreglass which is UV stable and it is characterised by high colour stability. All fastening material is galvanized or stainless steel.
