Interactive panel IP103D

Product type IP-103D-10

Basic information

Age category from 0 years Minimum area 4,3 m x 3,2 m

Equipment measurements 1,3 m x 0,12 m x 1,41 m

Free fall height: 0 r

Load capacity:

Max. number of users:
Fall zone: EN 1177
Designation:
Availability of spare parts:
Certificate of Compliance:

Not specified
null
exterior
supplied by the

Material

Wooden parts - thick glued wooden supports Metal parts - structural steel

Plastic parts - HDPE

4.3m

Finish

null

Hot-dip galvanizing

Description

The panel support structure is made from thick glued wooden supports. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys).

The wall is made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). All fastening material is galvanized or stainless steel.
