# **UNIVERSAL 4U142D**

Product type 4U-142D-15

### **Basic information**

Age category 3 - 15 years Minimum area 11,5 m x 7 m

**Equipment measurements** 7,7 m x 3,79 m x 3,48 m

1.5 m Free fall height: Load capacity: 486 kg Max. number of users: 9

Fall zone: EN 1177 null, 62,5 m<sup>2</sup> Designation: exterior Availability of spare parts: supplied by the Certificate of Compliance: ČSN EN 1176 - 1, 2, 3

#### Material

Wooden units - thick glued wooden supports

Metal units - structural steel Plastic units - HDPE, polyamide

Slide - fibreglass

Ropes and nets - polypropylene with a steel internal core

resistance). All fastening material is galvanized or stainless steel.

Apertures - plexiglass Flag - polyester fabric

#### **Finish**

Duplex powder coated with coat curing

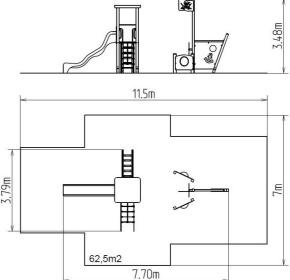

Hot-dip galvanizing

### **Description**

62,5m2 7.70 mThe tower unit support structure is made from thick glued wooden supports. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. The slide is made from fibreglass. The surfaces of the slide, steps, etc. are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The climbing net is made using HÉRKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and is connected with plastic or aluminium joints. The platform

## **Equipment**

Tower, slide, arched roof, barrier, post with a flag, drawing board, sloping net access, anchor, helm made from HDPE, 2x barrier with an aperture, sloping ramp with steps and metal handles.

and the drawing board are made from HPL (High-pressure laminate, which is characterised by high colour stability and water
