## Train VL110KS - silver

Product type

VL-110KS-10

## Basic informatio

Basic Information					
Age category Minimum area Equipment measurements Free fall height: Load capacity: Max. number of users:	0 - 10 years 8,6 m x 4,1 m 5,62 m x 1,17 m x 1,59 m 1 m 540 kg 10				
Fall zone: EN 1177 Designation: Availability of spare parts: Certificate of Compliance:	null exterior supplied by the ČSN EN 1176 - 1	<		8.6m	
Material	CSN EN 1170 1	1			
Metal units - structural steel Plastic units - HDPE Funnels - fibreglass		- <u>1.17m</u>		<u>,</u>	
<b>Finish</b> Duplex powder coated with c	oat curing	1	<	5.62m	~

Hot-dip galvanizing

## Description

The support structure of the train is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements, or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are anchored to concrete footings. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

All other parts of the play unit are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). Crawl tunnels are made from fibreglass which is UV stable and it is characterised by high colour stability. All fastening material is galvanized or stainless steel.
