UNIVERSAL 4U203KS - silver

4U-203KS-10

Product type

Basic information

Age category	2 - 15 years
Minimum area	5,8 m x 6,4 m
Equipment measurements	2,86 m x 2,98 m x 3,13 m
Free fall height:	1 m
Load capacity:	432 kg
Max. number of users:	8
Fall zone: EN 1177	null
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176 - 1, 2, 3

Material

Platform - HPL Metal units - structural steel Plastic units - HDPE, polyamide Slide - fibreglass Ropes and nets - polypropylene with a steel internal core Roof - HPL

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the tower unit is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life or duplex powder coated with coat curing according to RAL to prevent corrosion. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

The slide is made from fibreglass. The surfaces of the slides, steps, etc. are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The rope is made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core). The platforms and the drawing board are made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). The roof is made from HPL (High-pressure laminate, which is characterised by high colour stability, UV resistance and water resistance). All fastening material is galvanized or stainless steel.

Equipment

2x tower, slide, A-shaped roof, drawing board, sloping ramp with the rope and HDPE steps, 4x barrier from HDPE.
