UNIVERSAL 4U204KS - silver

Product type 4U-204KS-10

Basic information

Age category 2 - 15 years 5,8 m x 6,4 m Minimum area

Equipment measurements 2,87 m x 2,98 m x 3,13 m

Free fall height: 1 m 432 kg Load capacity: Max. number of users: 8 Fall zone: EN 1177 null Designation: exterior Availability of spare parts: supplied by the Certificate of Compliance: ČSN EN 1176 - 1, 2, 3

Material

Platform - HPL

Metal units - structural steel Plastic units - HDPE, polyamide

Slide - fibreglass Roof - HPL

Duplex powder coated with coat curing Hot-dip galvanizing

Description

5.8m 98m 2.87m

The support structure of the tower unit is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life or duplex powder coated with coat curing according to RAL to prevent corrosion. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

The slide is made from fibreglass. The surfaces of the slides, steps, etc. are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The platforms and the drawing board are made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). The roof is made from HPL (Highpressure laminate, which is characterised by high colour stability, UV resistance and water resistance). All fastening material is galvanized or stainless steel.

Equipment

2x tower, slide, A-shaped roof, drawing board, sloping ramp with steps and metal handles, 4x barrier from HDPE, abacus.
