

Ball toss PR101KW - brown

Product type PR-101KW-10

Basic information

Age category	from 0 years
Minimum area	4,2 m x 3,1 m
Equipment measurements	1,2 m x 0,08 m x 1,41 m
Free fall height:	0 m
Load capacity:	Not specified
Max. number of users:	Not specified
Fall zone: EN 1177	null
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176 - 1

Material

Plastic parts - HDPE
Metal parts - structural steel

Finish

Duplex powder coated with coat curing
Hot-dip galvanizing

Description

The supporting structure of the tear bar is made of structural steel, which is protected against corrosion by a zinc coating, which results in a very significant prolongation of the play element lifetime or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are embedded in a concrete bed. All other metal elements are also treated with zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

The wall is made of high-quality HDPE (high-pressure, full-color polyethylene, which is characterized by high color stability, resistance to scratching, UV resistance and especially safety because it is brittle and there is no risk of injury to children by sharp debris). All fasteners are galvanized or stainless steel.
