Description

The support structure of the workout set is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements or duplex powder coated with coat curing according to RAL to prevent corrosion. These structures are anchored to concrete footings with zinc anchors. All other metallic elements, such as handles, parallel bars etc., are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion or, if required by the customer, the elements can be made in stainless steel.

All bench boards and steps are made of high quality HDPE (high-pressure, full-coloured polyethylene, which is characterised by high colour stability, UV resistance and mainly safety because it is rigid and there is no risk of injury caused by sharp broken fragments). All connecting material is zinc or stainless steel coated.
