null

exterior

supplied by the

ČSN EN 1176 - 1

Material

Metal units - structural steel

5m 5m 5m 2.00m

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the rope bridge is made from structural steel (steel profile 100 x 100 mm), it is zinc coated which significantly prolongs the life of the play unit and KOMAXIT powder coated according to the RAL colour chart. The structure is fixed in a concrete bed. All other metal units are zinc coated and KOMAXIT powder coated according to the RAL. The wobbly beam is hung on a metal support using galvanized chains. All fastening material is galvanized or stainless steel.

Equipment

We offer three color variants of the support structure - red, blue and brown.
