

## Chain swing with a slide RH150KW-Q - Brown (f.h. 1 m) (Coastal

Product type RH-150KW-10-Q

### Basic information

|                              |                         |
|------------------------------|-------------------------|
| Age category                 | 2 - 15 years            |
| Minimum area                 | 7,3 m x 7,8 m           |
| Equipment measurements       | 4,3 m x 2,94 m x 1,77 m |
| Free fall height:            | 1 m                     |
| Load capacity:               | 270 kg                  |
| Max. number of users:        | 5                       |
| Fall zone: EN 1177           | null                    |
| Designation:                 | exterior                |
| Availability of spare parts: | supplied by the         |
| Certificate of Compliance:   | ČSN EN 1176 - 1, 2      |

### Material

Metal units - structural steel  
Platform - HPL  
Plastic units - HDPE  
Slide - fibreglass

### Finish

Duplex powder coated with coat curing  
Hot-dip galvanizing

### Description

The support structure of the swing is made from structural steel (steel profile 100 x 100 mm), which is zinc coated and KOMAXIT powder coated according to the RAL colour chart and is fixed in a concrete bed. The swing is hung on a metal beam using galvanized chains.

The slide is made from fibreglass. The surface of the slide is made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments).

The swing is hung on a metal girder using galvanized chains. The platform is made from HPL (High-pressure laminate). All fastening material is galvanized or stainless steel.

### Equipment

We offer three color variants of the support structure - red, blue and brown.
