

Train VL200KW-Q - brown (Coastal region)

Product type VL-200KW-10-Q

Basic information

Age category	0 - 10 years
Minimum area	8,6 m x 4,1 m
Equipment measurements	5,62 m x 1,17 m x 1,59 m
Free fall height:	1 m
Load capacity:	540 kg
Max. number of users:	10
Fall zone: EN 1177	null
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176 - 1

Material

Metal units - structural steel
 tunnel - laminate
 Wheels, platforms, ribs, chimney, seats - HPL
 Roof, side panels, front of the machine - HDPE

Finish

Duplex powder coated with coat curing
 Hot-dip galvanizing

Description

The support structure of the train engine is made of structural steel (metal profile 100 x 100 mm) which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements, and coating with baked paint KOMAXIT according to the RAL colour system. These structures are anchored to concrete footings. All other metallic elements are also zinc coated and treated with baked paint KOMAXIT according to the RAL colour system.

Roof, sides and front of the machine are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). All other parts of the play unit are made from HPL (High-pressure laminate). All fastening material is galvanized or stainless steel.
