Climbing set SS8605KS - silver

Product type

SS-8605KS-10

Basic	inform	atior
-------	--------	-------

Age category	2 - 10 years
Minimum area	6,95 m x 4,3 m
Equipment measurements	3,95 m x 1,3 m x 0,96 m
Free fall height:	1 m
Load capacity:	324 kg
Max. number of users:	6
Fall zone: EN 1177	null
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176 - 1

Material

Metal units - structural steel Ropes and nets - polypropylene with a steel internal core Plastic units - polyamide Climbing wall - HPL Climbing holds - mix of silica sand and epoxy resin

Finish

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The support structure of the climbing set is made from structural steel, it is zinc coated which significantly prolongs the life of the play unit or duplex powder coated with coat curing according to RAL to prevent corrosion and it is fixed in a concrete bed. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion... The climbing net, net and rope ladder are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and they are connected with plastic joints. The climbing wall is made from HPL (High-preSS88ure laminate,

which is characterised by high colour stability, UV resistance and water resistance). The climbing holds are made from the mix of silica sand and epoxy resin, which ensures long life, colour preservation as well as skin friendly surface. All fastening material is galvanized or stainleSS88 steel.
