Chain bridge RL102D (f.h. 1 m)

Product type RL-102D-10

Basic information

Age category 3 - 15 years Minimum area 5,3 m x 4 m

Equipment measurements 2,26 m x 1 m x 1,09 m

Free fall height:

Load capacity:

Max. number of users:

Fall zone: EN 1177

Designation:

Availability of spare parts:

Certificate of Compliance:

Duplex powder coated with coat curing Hot-dip galvanizing

Description

The chain bridge support structure is made from thick glued wooden supports. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground. All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion. The wobbly beams are hung on a metal support using galvanized chains. All fastening material is galvanized or stainless steel.
